Note 1. The Company and basis of presentation

ABB Ltd and its subsidiaries (collectively, the Company) together form a leading global company in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. The Company works with customers to engineer and install networks, facilities and plants with particular emphasis on enhancing efficiency, reliability and productivity for customers who generate, convert, transmit, distribute and consume energy.

The Company's Interim Consolidated Financial Information is prepared in accordance with United States of America generally accepted accounting principles (U.S. GAAP) for interim financial reporting. As such, the Interim Consolidated Financial Information does not include all the information and notes required under U.S. GAAP for annual consolidated financial statements. Therefore, such financial information should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report for the year ended December 31, 2013.

The preparation of financial information in conformity with U.S. GAAP requires management to make assumptions and estimates that directly affect the amounts reported in the Interim Consolidated Financial Information. The most significant, difficult and subjective of such accounting assumptions and estimates include:

- assumptions and projections, principally related to future material, labor and project-related overhead costs, used in determining the percentage-of-completion on projects,
- estimates of loss contingencies associated with litigation or threatened litigation and other claims and inquiries, environmental damages, product warranties, regulatory and other proceedings,
- assumptions used in the calculation of pension and postretirement benefits and the fair value of pension plan assets,
- recognition and measurement of current and deferred income tax assets and liabilities (including the measurement of uncertain tax positions),
- growth rates, discount rates and other assumptions used in testing goodwill for impairment,
- assumptions used in determining inventory obsolescence and net realizable value,
- estimates and assumptions used in determining the fair values of assets and liabilities assumed in business combinations,
- growth rates, discount rates and other assumptions used to determine impairment of long-lived assets, and
- assessment of the allowance for doubtful accounts.

The actual results and outcomes may differ from the Company's estimates and assumptions.

A portion of the Company's activities (primarily long-term construction activities) has an operating cycle that exceeds one year. For classification of current assets and liabilities related to such activities, the Company elected to use the duration of the individual contracts as its operating cycle. Accordingly, there are accounts receivable, inventories and provisions related to these contracts which will not be realized within one year that have been classified as current.

In the opinion of management, the unaudited Interim Consolidated Financial Information contains all necessary adjustments to present fairly the financial position, results of operations and cash flows for the reported interim periods. Management considers all such adjustments to be of a normal recurring nature.

The Interim Consolidated Financial Information is presented in United States dollars (\$) unless otherwise stated.

Note 2. Recent accounting pronouncements

Applicable in current period

Parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity

As of January 2014, the Company adopted an accounting standard update regarding the release of cumulative translation adjustments of a parent when it ceases to have a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity (for the Company, a foreign entity is an entity having a functional currency other than U.S. dollars). Under the update, the Company is required to release into net income the entire amount of a cumulative translation adjustment related to its investment in a foreign entity when a parent no longer has control as a result of selling a part or all of its investment in the foreign entity or otherwise no longer holds a controlling financial interest in a subsidiary or group of assets within the foreign entity. For foreign equity-accounted companies, a pro rata portion of the cumulative translation adjustment is required to be recognized in net income upon a partial sale of the equity-accounted company. This update did not have a material impact on the consolidated financial statements.

Presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists

As of January 2014, the Company adopted an accounting standard update regarding the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. Under the update, the Company is required to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except in certain defined circumstances. This update did not have a material impact on the consolidated financial statements.

Reporting discontinued operations and disclosures of disposals of components of an entity

In April 2014, an accounting standard update was issued which changes the criteria for reporting discontinued operations and modifies the related disclosure requirements. Under the update, the Company would report a disposal, or planned disposal, of a component or group of components, as a discontinued operation if the disposal represents a strategic shift that has (or will have) a major effect on the Company's operations and financial results. A strategic shift could include a disposal of a major geographical area, a major line of business, a major equity-method investment, or other major parts of the Company. A component may be a reportable segment or an operating segment, a reporting unit, a subsidiary, or an asset group. In addition to expanding the existing disclosures for discontinued operations, the update requires new disclosures relating to (i) individually significant disposals that do not qualify for discontinued operations presentation, (ii) continuing involvement with a discontinued operation following the date of disposal and (iii) retained equity-method investments in a discontinued operation. The Company has elected to early adopt this update in the first quarter of 2014 and this update did not have a material impact on the consolidated financial statements.

Note 3. Cash and equivalents, marketable securities and short-term investments

Current assets

Cash and equivalents, marketable securities and short-term investments consisted of the following:

	March 31, 2014						
(\$ in millions)	Cost basis	Gross unrealized gains	Gross unrealized losses	Fair value	Cash and equivalents	Marketable securities and short-term investments	
Cash	2,443			2,443	2,443		
Time deposits	3,951			3,951	3,787	164	
Other short-term investments	285			285		285	
Debt securities available-for-sale:							
 U.S. government obligations 	103	2	(1)	104	-	104	
 Other government obligations 	3	-	-	3	-	3	
Corporate	316	4	(1)	319	172	147	
Equity securities available-for-sale	155	9	(2)	162	-	162	
Total	7,256	15	(4)	7,267	6,402	865	

	December 31, 2013						
(\$ in millions)	Cost basis	Gross unrealized gains	Gross unrealized losses	Fair value	Cash and equivalents	Marketable securities and short-term investments	
Cash	2,414			2,414	2,414		
Time deposits	3,556			3,556	3,538	18	
Other short-term investments	9			9		9	
Debt securities available-for-sale:							
 U.S. government obligations 	103	2	(1)	104	-	104	
 European government obligations 	24	1	-	25	-	25	
 Other government obligations 	3	-	-	3	-	3	
Corporate	212	4	(1)	215	69	146	
Equity securities available-for-sale	154	9	(4)	159	-	159	
Total	6,475	16	(6)	6,485	6,021	464	

December 31 2013

Included in Other short-term investments at March 31, 2014, are receivables of \$276 million representing reverse repurchase agreements. These collateralized lendings, made to a financial institution, have maturity dates of less than one year.

Non-current assets

Included in "Other non-current assets" are certain held-to-maturity marketable securities. At March 31, 2014, the amortized cost, gross unrecognized gain and fair value (based on quoted market prices) of these securities were \$96 million, \$16 million and \$112 million, respectively. At December 31, 2013, the amortized cost, gross unrecognized gain and fair value (based on quoted market prices) of these securities were \$104 million, \$17 million and \$121 million, respectively. These securities are pledged as security for certain outstanding deposit liabilities and the funds received at the respective maturity dates of the securities will only be available to the Company for repayment of these obligations.

Note 4. Derivative financial instruments

The Company is exposed to certain currency, commodity, interest rate and equity risks arising from its global operating, financing and investing activities. The Company uses derivative instruments to reduce and manage the economic impact of these exposures.

Currency risk

Due to the global nature of the Company's operations, many of its subsidiaries are exposed to currency risk in their operating activities from entering into transactions in currencies other than their functional currency. To manage such currency risks, the Company's policies require the subsidiaries to hedge their foreign currency exposures from binding sales and purchase contracts denominated in foreign currencies. For forecasted foreign currency denominated sales of standard products and the related foreign currency denominated purchases, the Company's policy is to hedge up to a maximum of 100 percent of the forecasted foreign currency denominated exposures, depending on the length of the forecasted exposures. Forecasted exposures greater than 12 months are not hedged. Forward foreign exchange contracts are the main instrument used to protect the Company against the volatility of future cash flows (caused by changes in exchange rates) of contracted and forecasted sales and purchases denominated in foreign currencies. In addition, within its treasury operations, the Company primarily uses foreign exchange swaps and forward foreign exchange contracts to manage the currency and timing mismatches arising in its liquidity management activities.

Commodity risk

Various commodity products are used in the Company's manufacturing activities. Consequently it is exposed to volatility in future cash flows arising from changes in commodity prices. To manage the price risk of commodities other than electricity, the Company's policies require that the subsidiaries hedge the commodity price risk exposures from binding contracts, as well as at least 50 percent (up to a maximum of 100 percent) of the forecasted commodity exposure over the next 12 months or longer (up to a maximum of 18 months). Swap and futures contracts are used to manage the associated price risks of commodities. As of 2014, the Company no longer enters into electricity futures contracts to manage the price risk on its forecasted electricity needs in certain locations.

Interest rate risk

The Company has issued bonds at fixed rates. Interest rate swaps are used to manage the interest rate risk associated with certain debt and generally such swaps are designated as fair value hedges. In addition, from time to time, the Company uses instruments such as interest rate swaps, interest rate futures, bond futures or forward rate agreements to manage interest rate risk arising from the Company's balance sheet structure but does not designate such instruments as hedges.

Equity risk

The Company is exposed to fluctuations in the fair value of its warrant appreciation rights (WARs) issued under its management incentive plan. A WAR gives its holder the right to receive cash equal to the market price of an equivalent listed warrant on the date of exercise. To eliminate such risk, the Company has purchased cash-settled call options which entitle the Company to receive amounts equivalent to its obligations under the outstanding WARs.

Volume of derivative activity

In general, while the Company's primary objective in its use of derivatives is to minimize exposures arising from its business, certain derivatives are designated and qualify for hedge accounting treatment while others either are not designated or do not qualify for hedge accounting.

Foreign exchange and interest rate derivatives:

The gross notional amounts of outstanding foreign exchange and interest rate derivatives (whether designated as hedges or not) were as follows:

Type of derivative	Total notional amounts				
(\$ in millions)	March 31, 2014	December 31, 2013	March 31, 2013		
Foreign exchange contracts	19,060	19,351	18,803		
Embedded foreign exchange derivatives	2,958	3,049	3,599		
Interest rate contracts	6,702	4,693	3,880		

Derivative commodity contracts:

The following table shows the notional amounts of outstanding commodity derivatives (whether designated as hedges or not), on a net basis, to reflect the Company's requirements in the various commodities:

Type of derivative	Unit	Total notional amounts				
		March 31, 2014	December 31, 2013	March 31, 2013		
Copper swaps	metric tonnes	43,866	42,866	45,902		
Aluminum swaps	metric tonnes	3,873	3,525	5,223		
Nickel swaps	metric tonnes	12	18	18		
Lead swaps	metric tonnes	5,175	7,100	11,425		
Zinc swaps	metric tonnes	275	300	200		
Silver swaps	ounces	1,813,511	1,936,581	2,120,911		
Electricity futures	megawatt hours	-	279,995	365,413		
Crude oil swaps	barrels	142,000	113,000	129,816		

Equity derivatives:

At March 31, 2014, December 31, 2013, and March 31, 2013, the Company held 66 million, 67 million and 62 million cash-settled call options indexed to ABB Ltd shares (conversion ratio 5:1) with a total fair value of \$50 million, \$56 million and \$33 million, respectively.

Cash flow hedges

As noted above, the Company mainly uses forward foreign exchange contracts to manage the foreign exchange risk of its operations, commodity swaps to manage its commodity risks and cash-settled call options to hedge its WAR liabilities. Where such instruments are designated and qualify as cash flow hedges, the effective portion of the changes in their fair value is recorded in "Accumulated other comprehensive loss" and subsequently reclassified into earnings in the same line item and in the same period as the underlying hedged transaction affects earnings. Any ineffectiveness in the hedge relationship, or hedge component excluded from the assessment of effectiveness, is recognized in earnings during the current period.

At March 31, 2014, and December 31, 2013, "Accumulated other comprehensive loss" included net unrealized gains of \$10 million and \$22 million, respectively, net of tax, on derivatives designated as cash flow hedges. Of the amount at March 31, 2014, net gains of \$13 million are expected to be reclassified to earnings in the following 12 months. At March 31, 2014, the longest maturity of a derivative classified as a cash flow hedge was 66 months.

The amount of gains or losses, net of tax, reclassified into earnings due to the discontinuance of cash flow hedge accounting and the amount of ineffectiveness in cash flow hedge relationships directly recognized in earnings were not significant in the three months ended March 31, 2014 and 2013.

The pre-tax effects of derivative instruments, designated and qualifying as cash flow hedges, on "Accumulated other comprehensive loss" (OCI) and the Consolidated Income Statements were as follows:

Three months	ended	March	31, 2014
--------------	-------	-------	----------

Type of derivative re designated as OCI		ins (losses) cognized in on derivatives ective portion)	Gains (losses) reclassified from OCI into income (effective portion)		Gains (losses) recognized in income (ineffective portion and amount excluded from effectiveness testing)		
		(\$ in millions)	Location	(\$ in millions)	Location	(\$ in millions)	
Foreign exchange cont	tracts	(6)	Total revenues	1	Total revenues	-	
			Total cost of sales	3	Total cost of sales	-	
Commodity contracts		(4)	Total cost of sales	(1)	Total cost of sales	<u>-</u>	
Cash-settled call option Total	ns	(4) (14)	SG&A expenses ⁽¹⁾	(1) 2	SG&A expenses ⁽¹⁾	-	

Thron	months	andad	March	21	2012

Type of derivative recog designated as OCI on o		ains (losses) cognized in on derivatives ective portion)	Gains (losses) from OCI int (effective p	o income	Gains (losses) recognized in inco (ineffective portion and amoun excluded from effectiveness test	
		(\$ in millions)	Location	(\$ in millions)	Location	(\$ in millions)
Foreign exchange cont	racts	17	Total revenues	11	Total revenues	-
			Total cost of sales	(4)	Total cost of sales	-
Commodity contracts		(2)	Total cost of sales	1	Total cost of sales	<u>-</u>
Cash-settled call option	าร	7	SG&A expenses ⁽¹⁾	2	SG&A expenses ⁽¹⁾	
Total		22		10		

⁽¹⁾ SG&A expenses represent "Selling, general and administrative expenses".

Net derivative gains of \$1 million and \$9 million, both net of tax, were reclassified from "Accumulated other comprehensive loss" to earnings during the three months ended March 31, 2014 and 2013, respectively.

Fair value hedges

To reduce its interest rate exposure arising primarily from its debt issuance activities, the Company uses interest rate swaps. Where such instruments are designated as fair value hedges, the changes in the fair value of these instruments, as well as the changes in fair value of the risk component of the underlying debt being hedged, are recorded as offsetting gains and losses in "Interest and other finance expense". Hedge ineffectiveness of instruments designated as fair value hedges for the three months ended March 31, 2014 and 2013, was not significant.

The effect of derivative instruments, designated and qualifying as fair value hedges, on the Consolidated Income Statements was as follows:

Three months ended March 31

Type of derivative designated as a fair value hedge	Gains (losses) recogniz on derivatives desiç fair value hed	gnated as	Gains (losses) reco income on hedg	•
	Location	(\$ in millions)	Location	(\$ in millions)
Interest rate contracts	Interest and other finance expense	22	Interest and other finance expense	(22)
	Three mont	hs ended March 3	1, 2013	
Type of derivative designated as a fair value hedge	Gains (losses) recogniz on derivatives desiç fair value hed	nated as	Gains (losses) reco income on hedge	•
	Location	(\$ in millions)	Location	(\$ in millions)
Interest rate contracts	Interest and other finance expense	(18)	Interest and other finance expense	17

Derivatives not designated in hedge relationships

Derivative instruments that are not designated as hedges or do not qualify as either cash flow or fair value hedges are economic hedges used for risk management purposes. Gains and losses from changes in the fair values of such derivatives are recognized in the same line in the income statement as the economically hedged transaction.

Furthermore, under certain circumstances, the Company is required to split and account separately for foreign currency derivatives that are embedded within certain binding sales or purchase contracts denominated in a currency other than the functional currency of the subsidiary and the counterparty.

The gains (losses) recognized in the Consolidated Income Statements on derivatives not designated in hedging relationships were as follows:

Gains (losses) recognized in income				
	Three months ended March 31,			
Location	2014	2013		
Total revenues	(23)	8		
Total cost of sales	(10)	(82)		
SG&A expenses ⁽¹⁾	1	(3)		
Interest and other finance expense	4	(143)		
Total revenues	10	(13)

Commodity contracts	-	-	3	-	
Interest rate contracts	-	32	-	3	
Cash-settled call options	11	37			
Total	24	73	11	6	
Derivatives not designated as hedging instruments:					
Foreign exchange contracts	159	31	123	16	
Commodity contracts	2	-	24	1	
Cash-settled call options	-	2	-	-	
Embedded foreign exchange derivatives	40	27	48	10	
Total	201	60	195	27	
Total fair value	225	133	206	33	
Thereof, subject to close-out netting agreements	168	66	141	22	

	December 31, 2013				
	Derivative assets		Derivative	liabilities	
(\$ in millions)	Current in "Other current assets"	Non-current in "Other non-current assets"	Current in "Other current liabilities"	Non-current in "Other non-current liabilities"	
Derivatives designated as hedging instruments:					
Foreign exchange contracts	21	8	10	3	
Commodity contracts	2	-	1	-	
Interest rate contracts	-	14	-	7	
Cash-settled call options	14	40	<u> </u>		
Total	37	62	11	10	
Derivatives not designated as hedging instruments:					
Foreign exchange contracts	272	42	121	30	
Commodity contracts	6	1	15	1	
Cash-settled call options	-	2	-	-	
Embedded foreign exchange derivatives	57	21	55	11	
Total	335	66	191	42	
Total fair value	372	128	202	52	
Thereof, subject to close-out netting agreements	284	63	130	40	

Close-out netting agreements provide for the termination, valuation and net settlement of some or all outstanding transactions between two counterparties on the occurrence of one or more pre-defined trigger events.

Although the Company is party to close-out netting agreements with most derivative counterparties, the fair values in the tables above and in the Consolidated Balance Sheets at March 31, 2014, and December 31, 2013, have been presented on a gross basis.

Note 5. Fair values

The Company uses fair value measurement principles to record certain financial assets and liabilities on a recurring basis and, when necessary, to record certain non-financial assets at fair value on a non-recurring basis, as well as to determine fair value disclosures for certain financial instruments carried at amortized cost in the financial statements. Financial assets and liabilities recorded at fair value on a recurring basis include foreign currency, commodity and interest rate derivatives, as well as cash-settled call options and available-for-sale securities. Non-financial assets recorded at fair value on a non-recurring basis include long-lived assets that are reduced to their estimated fair value due to impairments.

Fair value is the price that would be received when selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various valuation techniques including the market approach (using observable market data for identical or similar assets and liabilities), the income approach (discounted cash flow models) and the cost approach (using costs a market participant would incur to develop a comparable asset). Inputs used to determine the fair value of assets and liabilities are defined by a three-level hierarchy, depending on the reliability of those inputs. The Company has categorized its financial assets and liabilities and non-financial assets measured at fair value within this hierarchy based on whether the inputs to the valuation technique are observable or unobservable. An observable input is based on market data obtained from independent sources, while an unobservable input reflects the Company's assumptions about market data.

The levels of the fair value hierarchy are as follows:

Level 1: Valuation inputs consist of quoted prices in an active market for identical assets or liabilities (observable quoted prices). Assets and liabilities valued using Level 1 inputs include listed derivatives which are actively traded such as commodity futures, interest rate futures and certain actively-traded debt securities.

Level 2: Valuation inputs consist of observable inputs (other than Level 1 inputs) such as actively-quoted prices for similar assets, quoted prices in inactive markets and inputs other than quoted prices such as interest rate yield curves, credit spreads, or inputs derived from other observable data by interpolation, correlation, regression or other means. The adjustments applied to quoted prices or the inputs used in valuation models may be both observable and unobservable. In these cases, the fair value measurement is classified as Level 2 unless the unobservable portion of the adjustment or the unobservable input to the valuation model is significant, in which case the fair value measurement would be classified as Level 3. Assets and liabilities valued or disclosed using Level 2 inputs include investments in certain funds, certain debt securities that are not actively traded, interest rate swaps, commodity swaps, cash-settled call options, forward foreign exchange contracts, foreign exchange swaps and forward rate agreements, time deposits, as well as financing receivables and debt.

Level 3: Valuation inputs are based on the Company's assumptions of relevant market data (unobservable input).

Whenever quoted prices involve bid-ask spreads, the Company ordinarily determines fair values based on mid-market quotes. However, for the purpose of determining the fair value of cash-settled call options serving as hedges of the Company's management incentive plan, bid prices are used.

When determining fair values based on quoted prices in an active market, the Company considers if the level of transaction activity for the financial instrument has significantly decreased, or would not be considered orderly. In such cases, the resulting changes in valuation techniques would be disclosed. If the market is considered disorderly or if quoted prices are not available, the Company is required to use another valuation technique, such as an income approach.

Recurring fair value measures

The fair values of financial assets and liabilities measured at fair value on a recurring basis were as follows:

	March 31, 2014			
(\$ in millions)	Level 1	Level 2	Level 3	Total fair value
Assets				
Available-for-sale securities in "Cash and equivalents":				
Debt securities—Corporate	-	172	-	172
Available-for-sale securities in "Marketable securities and short-term investments":				
Equity securities	-	162	-	162
Debt securities—U.S. government obligations	104	-	-	104
Debt securities—Other government obligations	-	3	-	3
Debt securities—Corporate	-	147	-	147
Derivative assets—current in "Other current assets"	-	225	-	225
Derivative assets—non-current in "Other non-current assets"		133		133
Total	104	842		946
Liabilities				
Derivative liabilities—current in "Other current liabilities"	-	206	-	206
Derivative liabilities—non-current in "Other non-current liabilities"		33		33
Total		239		239

	December 31, 2013			
(\$ in millions)	Level 1	Level 2	Level 3	Total fair value
Assets				
Available-for-sale securities in "Cash and equivalents":				
Debt securities—Corporate	-	69	-	69
Available-for-sale securities in "Marketable securities and short-term investments":				
Equity securities	-	159	-	159
Debt securities—U.S. government obligations	104	-	-	104
Debt securities—European government obligations	25	-	-	25
Debt securities—Other government obligations	-	3	-	3
Debt securities—Corporate	-	146	-	146
Derivative assets—current in "Other current assets"	-	372	-	372
Derivative assets—non-current in "Other non-current assets"		128		128
Total	129	877		1,006
Liabilities				
Derivative liabilities—current in "Other current liabilities"	3	199	-	202
Derivative liabilities—non-current in "Other non-current liabilities"		52		52
Total	3	251	-	254

The Company uses the following methods and assumptions in estimating fair values of financial assets and liabilities measured at fair value on a recurring basis:

- Available-for-sale securities in "Cash and equivalents" and "Marketable securities and short-term investments": If quoted market prices in active markets for identical assets are available, these are considered Level 1 inputs; however, when markets are not active, these inputs are considered Level 2. If such quoted market prices are not available, fair value is determined using market prices for similar assets or present value techniques, applying an appropriate risk-free interest rate adjusted for nonperformance risk. The inputs used in present value techniques are observable and fall into the Level 2 category.
- Derivatives: The fair values of derivative instruments are determined using quoted prices of identical instruments from an active market, if available (Level 1). If quoted prices are not available, price quotes for similar instruments, appropriately adjusted, or present value techniques, based on available market data, or option pricing models are used. Cash-settled call options hedging the Company's WAR liability are valued based on bid prices of the equivalent listed warrant. The fair values obtained using price quotes for similar instruments or valuation techniques represent a Level 2 input unless significant unobservable inputs are used.

Non-recurring fair value measures

There were no significant non-recurring fair value measurements during the three months ended March 31, 2014 and 2013.

Disclosure about financial instruments carried on a cost basis

The fair values of financial instruments carried on a cost basis were as follows:

	March 31, 2014				
(6.1	Carrying value	Level 1	Level 2	Level 3	Total fair value

The Company uses the following methods and assumptions in estimating fair values of financial instruments carried on a cost basis:

- Cash and equivalents (excluding available-for-sale debt securities with original maturities up to 3 months), and Marketable securities and short-term investments (excluding available-for-sale securities): The carrying amounts approximate the fair values as the items are short-term in nature.
- Other non-current assets: Includes (i) loans granted whose fair values are based on the carrying amount adjusted using a present value technique to reflect a premium or discount based on current market interest rates (Level 2 inputs), (ii) held-to-maturity securities (see Note 4) whose fair values are based on quoted market prices in inactive markets (Level 2 inputs), (iii) restricted cash whose fair values approximate the carrying amounts (Level 1) and (iv) cash deposits pledged in respect of certain non-current deposit liabilities whose fair values are determined using a discounted cash flow methodology based on current market interest rates (Level 2 inputs).
- Short-term debt and current maturities of long-term debt (excluding finance lease liabilities):
 Includes commercial paper, bank borrowings and overdrafts. The carrying amounts of short-term debt and current maturities of long-term debt, excluding finance lease liabilities, approximate their fair values.
- Long-term debt (excluding finance lease liabilities): Fair values of outstanding bonds are
 determined using quoted market prices (Level 1 inputs). The fair values of other debt are
 determined using a discounted cash flow methodology based upon borrowing rates of similar
 debt instruments and reflecting appropriate adjustments for non-performance risk (Level 2
 inputs).
- Non-current deposit liabilities in "Other non-current liabilities": The fair values of non-current deposit liabilities are determined using a discounted cash flow methodology based on riskadjusted interest rates (Level 2 inputs).

Note 6. Debt

The Company's total debt at March 31, 2014, and December 31, 2013, amounted to \$9,047 million and \$8,023 million, respectively.

Short-term debt and current maturities of long-term debt

The Company's "Short-term debt and current maturities of long-term debt" consisted of the following:

(\$ in millions)	March 31, 2014	December 31, 2013
Short-term debt	1,406	423
Current maturities of long-term debt	29	30
Total	1,435	453

Short-term debt primarily represents issued commercial paper and short-term loans from various banks. At March 31, 2014, and December 31, 2013, the amount outstanding under the United States commercial paper program was \$1,095 million and \$100 million, respectively.

Long-term debt

The Company's long-term debt at March 31, 2014, and December 31, 2013, amounted to \$7,612 million and \$7,570 million, respectively.

Note 7. Commitments and contingencies

Contingencies—Environmental

The Company is engaged in environmental clean-up activities at certain sites arising under various United States and other environmental protection laws and under certain agreements with third parties. In some cases, these environmental remediation actions are subject to legal proceedings, investigations or claims, and it is uncertain to what extent the Company is actually obligated to perform. Provisions for these unresolved matters have been set up if it is probable that the Company has incurred a liability and the amount of loss can be reasonably estimated. The lower end of an estimated range is accrued when a single best estimate is not determinable. The required amounts of the provisions may change in the future as developments occur.

If a provision has been recognized for any of these matters, the Company records an asset when it is probable that it will recover a portion of the costs expected to be incurred to settle them. Management is of the opinion, based upon information presently available, that the resolution of any such obligation and non-collection of recoverable costs would not have a further material adverse effect on the Company's consolidated financial statements.

The Company is involved in the remediation of environmental contamination at present or former facilities, primarily in the United States. The clean-up of these sites involves primarily soil and groundwater contamination. A significant portion of the provisions in respect of these contingencies reflects the provisions of acquired companies. A portion of one of the acquired entities' remediation liability is indemnified by a prior owner. Accordingly, an asset equal to that portion of the remediation liability is included in "Other non-current assets".

Environmental provisions included in the Company's Consolidated Balance Sheets were as follows:

(\$ in millions)	March 31, 2014	December 31, 2013
Other provisions	35	37
Other non-current liabilities	113	116
Total environmental provisions	148	153

Provisions for the above estimated losses have not been discounted as the timing of payments cannot be reasonably estimated.

Contingencies—Regulatory, Compliance and Legal

Antitrust

In April 2014, the European Commission announced its decision regarding its investigation of anticompetitive practices in the cables industry and granted the Company full immunity from fines under the European Commission's leniency program. In December 2013, the Company agreed with the Brazilian Antitrust Authority (CADE) to settle its ongoing investigation into the Company's involvement in anticompetitive practices in the cables industry and the Company agreed to pay a fine of approximately 1.5 million Brazilian reals (equivalent to approximately \$1 million on date of payment). The Company's cables business remains under investigation for alleged anticompetitive practices in certain other jurisdictions. An informed judgment about the outcome of these remaining investigations or the amount of potential loss or range of loss for the Company, if any, relating to these remaining investigations cannot be made at this stage.

In Brazil, the Company's Gas Insulated Switchgear business is under investigation by the CADE for alleged anticompetitive practices. In addition, the CADE has opened an investigation into certain other power businesses of the Company, including flexible alternating current transmission systems (FACTS) and power transformers. An informed judgment about the outcome of these investigations or the amount of potential loss or range of loss for the Company, if any, relating to these investigations cannot be made at this stage.

In Italy, one of the Company's recently acquired subsidiaries was raided in October 2013 by the Italian Antitrust Agency for alleged anticompetitive practices. An informed judgment about the outcome of this

investigation or the amount of potential loss or range of loss for the Company, if any, relating to this investigation cannot be made at this stage.

With respect to those aforementioned matters which are still ongoing, management is cooperating fully with the antitrust authorities.

Suspect payments

In April 2005, the Company voluntarily disclosed to the United States Department of Justice (DoJ) and the United States Securities and Exchange Commission (SEC) certain suspect payments in its network management unit in the United States. Subsequently, the Company made additional voluntary disclosures to the DoJ and the SEC regarding suspect payments made by other Company subsidiaries in a number of countries in the Middle East, Asia, South America and Europe (including to an employee of an Italian power generation company) as well as by its former Lummus business. These payments were discovered by the Company as a result of the Company's internal audit program and compliance reviews.

In September 2010, the Company reached settlements with the DoJ and the SEC regarding their investigations into these matters and into suspect payments involving certain of the Company's subsidiaries in the United Nations Oil-for-Food Program. In connection with these settlements, the Company agreed to make payments to the DoJ and SEC totaling \$58 million, which were settled in the fourth quarter of 2010. One subsidiary of the Company pled guilty to one count of conspiracy to violate the anti-bribery provisions of the U.S. Foreign Corrupt Practices Act and one count of violating those provisions. The Company entered into a deferred prosecution agreement and settled civil charges brought by the SEC. These settlements resolved the foregoing investigations. In lieu of an external compliance monitor, the DoJ and SEC agreed to allow the Company to report on its continuing compliance efforts and the results of the review of its internal processes through September 2013. Further to the Fraud Section of the DoJ determining that the Company had fully complied with all its obligations under the deferred prosecution agreement, on October 1, 2013, the competent court in the U.S. agreed to dismiss all criminal charges against the Company in relation to these matters.

General

In addition, the Company is aware of proceedings, or the threat of proceedings, against it and others in respect of private claims by customers and other third parties with regard to certain actual or alleged anticompetitive practices. Also, the Company is subject to other various legal proceedings, investigations, and claims that have not yet been resolved. With respect to the above-mentioned regulatory matters and commercial litigation contingencies, the Company will bear the costs of the continuing investigations and any related legal proceedings.

Liabilities recognized

At March 31, 2014, and December 31, 2013, the Company had aggregate liabilities of \$240 million and \$245 million, respectively, included in "Other provisions" and "Other non-current liabilities", for the above regulatory, compliance and legal contingencies, and none of the individual liabilities recognized was significant. As it is not possible to make an informed judgment on the outcome of certain matters and as it is not possible, based on information currently available to management, to estimate the maximum potential liability on other matters, there could be material adverse outcomes beyond the amounts accrued.

Guarantees

General

The following table provides quantitative data regarding the Company's third-party guarantees. The maximum potential payments represent a "worst-case scenario", and do not reflect management's expected results. The carrying amount of liabilities recorded in the Consolidated Balance Sheets reflects the Company's best estimate of future payments, which it may incur as part of fulfilling its guarantee obligations.

	Maximum potential payments			
(\$ in millions)	March 31, 2014	December 31, 2013		
Performance guarantees	147	149		
Financial guarantees	77	77		
Indemnification guarantees	50	50		
Total	274	276		

In respect of the above guarantees, the carrying amounts of liabilities at March 31, 2014, and December 31, 2013, were not significant.

Performance guarantees

Performance guarantees represent obligations where the Company guarantees the performance of a third party's product or service according to the terms of a contract. Such guarantees may include guarantees that a project will be completed within a specified time. If the third party does not fulfill the obligation, the Company will compensate the guaranteed party in cash or in kind. Performance guarantees include surety bonds, advance payment guarantees and standby letters of credit. The significant performance guarantees are described below.

The Company retained obligations for guarantees related to the Power Generation business contributed in mid-1999 to the former ABB Alstom Power NV joint venture (Alstom Power NV). The guarantees primarily consist of performance guarantees and other miscellaneous guarantees under certain contracts such as indemnification for personal injuries and property damages, taxes and compliance with labor laws, environmental laws and patents. These guarantees have no fixed expiration date. In May 2000, the Company sold its interest in Alstom Power NV to Alstom SA (Alstom). As a result, Alstom and its subsidiaries have primary responsibility for performing the obligations that are the subject of the guarantees. Further, Alstom, the parent company and Alstom Power NV, have undertaken jointly and severally to fully indemnify and hold harmless the Company against any claims arising under such guarantees. Management's best estimate of the total maximum potential amount payable of quantifiable guarantees issued by the Company on behalf of its former Power Generation business was \$65 million at both March 31, 2014, and December 31, 2013, and is subject to foreign exchange fluctuations. The Company has not experienced any losses related to guarantees issued on behalf of the former Power Generation business.

The Company is engaged in executing a number of projects as a member of consortia that include third parties. In certain of these cases, the Company guarantees not only its own performance but also the work of third parties. The original maturity dates of these guarantees range from one to six years. At both March 31, 2014, and December 31, 2013, the maximum potential amount payable under these guarantees as a result of third-party non-performance was \$70 million.

Financial guarantees and commercial commitments

Financial guarantees represent irrevocable assurances that the Company will make payment to a beneficiary in the event that a third party fails to fulfill its financial obligations and the beneficiary under the guarantee incurs a loss due to that failure.

At both March 31, 2014, and December 31, 2013, the Company had a maximum potential amount payable of \$77 million under financial guarantees outstanding. Of this amount, \$15 million was in respect of guarantees issued on behalf of companies in which the Company formerly had or has an equity interest. The guarantees outstanding have various maturity dates up to 2020.

In addition, in the normal course of bidding for and executing certain projects, the Company has entered into standby letters of credit, bid/performance bonds and surety bonds (collectively "performance bonds") with various financial institutions. Customers can draw on such performance bonds in the event that the Company does not fulfill its contractual obligations. The Company would then have an obligation to reimburse the financial institution for amounts paid under the performance bonds. There have been no significant amounts reimbursed to financial institutions under these types of arrangements during the three months ended March 31, 2014 and 2013.

Indemnification quarantees

The Company has indemnified certain purchasers of divested businesses for potential claims arising from the operations of the divested businesses. To the extent the maximum potential loss related to such indemnifications could not be calculated, no amounts have been included under maximum potential payments in the table above. Indemnifications for which maximum potential losses could not be calculated include indemnifications for legal claims. The significant indemnification guarantees for which maximum potential losses could be calculated are described below.

The Company issued to the purchasers of Lummus Global guarantees related to assets and liabilities divested in 2007. The maximum potential amount payable relating to this business, pursuant to the sales agreement, at each of March 31, 2014, and December 31, 2013, was \$50 million.

Product and order-related contingencies

The Company calculates its provision for product warranties based on historical claims experience and specific review of certain contracts.

The reconciliation of the "Provisions for warranties", including guarantees of product performance, was as follows:

(\$ in millions)	2014	2013
Balance at January 1,	1,362	1,291
Claims paid in cash or in kind	(79)	(58)
Net increase in provision for changes in estimates, warranties issued and warranties expired	29	40
Exchange rate differences	(5)	(31)
Balance at March 31,	1,307	1,242

Note 8. Employee benefits

The Company operates defined benefit and defined contribution pension plans and termination indemnity plans, in accordance with local regulations and practices. These plans cover a large portion of the Company's employees and provide benefits to employees in the event of death, disability, retirement, or termination of employment. Certain of these plans are multi-employer plans. The Company also operates other postretirement benefit plans including postretirement health care benefits, and other employee-related benefits for active employees including long-service award plans. The measurement date used for the Company's employee benefit plans is December 31. The funding policies of the Company's plans are consistent with the local government and tax requirements and several of the plans are not required to be funded according to local government and tax requirements.

Net periodic benefit cost of the Company's defined benefit pension and other postretirement benefit plans consisted of the following:

	Three months ended March 31,			
	2014	2013	2014	2013
(\$ in millions)	Defined p benef		Other post	
Service cost	64	62	-	-
Interest cost	105	92	2	2
Expected return on plan assets	(124)	(118)	-	-
Amortization of prior service cost	7	8	(2)	(2)
Amortization of net actuarial loss	26	33		1
Net periodic benefit cost	78	77		1

Employer contributions were as follows:

	Three months ended March 31,			
	2014	2013	2014	2013
(\$ in millions)	Defined pension benefits		Other postretirement benefits	
Total contributions to defined benefit pension and other postretirement benefit plans	131	60	3	4
Of which, discretionary contributions to defined benefit pension plans	75	-	-	-

At March 31, 2014, the discretionary contributions included available-for-sale debt securities, having a fair value at the contribution date of \$25 million, to certain of the Company's pension plans in the United Kingdom.

The Company expects to make contributions totaling approximately \$309 million and \$19 million to its defined benefit pension plans and other postretirement benefit plans, respectively, for the full year 2014.

Note 9. Earnings per share

Basic earnings per share is calculated by dividing income by the weighted-average number of shares outstanding during the period. Diluted earnings per share is calculated by dividing income by the weighted-average number of shares outstanding during the period, assuming that all potentially dilutive securities were exercised, if dilutive. Potentially dilutive securities comprise outstanding written call options and outstanding options and shares granted subject to certain conditions under the Company's share-based payment arrangements.

Basic	earnings	per	share:
-------	----------	-----	--------

basic earnings per snare.	Three montl March	
(\$ in millions, except per share data in \$)	2014	2013
Amounts attributable to ABB shareholders:		
Income from continuing operations, net of tax	545	668
Loss from discontinued operations, net of tax	(1)	(4)
Net income	544	664
Weighted-average number of shares outstanding (in millions)	2,301	2,296
Basic earnings per share attributable to ABB shareholders: Income from continuing operations, net of tax	0.24	0.29
Loss from discontinued operations, net of tax	-	-
Net income	0.24	0.29
Diluted earnings per share:	Three month March	31,
(\$ in millions, except per share data in \$)	2014	2013
Amounts attributable to ABB shareholders:		
Income from continuing operations, net of tax	545	668
Loss from discontinued operations, net of tax	(1)	(4)
Net income	544	664
Weighted-average number of shares outstanding (in millions) Effect of dilutive securities:	2,301	2,296
Call options and shares	10	7
Dilutive weighted-average number of shares outstanding	2,311	2,303
Diluted earnings per share attributable to ABB shareholders:		
Income from continuing operations, net of tax	0.24	0.29
Loss from discontinued operations, net of tax		-
Net income	0.24	0.29

Note 10. Reclassifications out of accumulated other comprehensive loss

The following table shows changes in "Accumulated other comprehensive loss" (OCI) attributable to ABB, by component, net of tax:

(\$ in millions)	Foreign currency translation adjustments	Unrealized gains (losses) on available- for-sale securities	Pension and other postretirement plan adjustments	Unrealized gains (losses) of cash flow hedge derivatives	Total OCI
Balance at January 1, 2013	(580)	24	(2,004)	37	(2,523)
Other comprehensive (loss) income before reclassifications Amounts reclassified from OCI	(478) -	- (6)	62 29	19 (9)	(397) 14
Total other comprehensive (loss) income	(478)	(6)	91	10	(383)
Less: Amounts attributable to noncontrolling interests	(3)		1	<u>-</u>	(2)
Balance at March 31, 2013	(1,055)	18	(1,914)	47	(2,904)

(\$ in millions)	Foreign currency translation adjustments	Unrealized gains (losses) on available- for-sale securities	Pension and other postretirement plan adjustments	Unrealized gains (losses) of cash flow hedge derivatives	Total OCI
Balance at January 1, 2014	(431)	7	(1,610)	22	(2,012)
Other comprehensive (loss) income before reclassifications Amounts reclassified from OCI	(76)	3 (1)	(10) 23	(11) (1)	(94) 21
Total other comprehensive (loss) income	(76)	2	13	(12)	(73)
Less: Amounts attributable to noncontrolling interests	(3)	-	-	-	(3)
Balance at March 31, 2014	(504)	9	(1,597)	10	(2,082)

The following table reflects amounts reclassified out of OCI in respect of pension and other postretirement plan adjustments:

Location of (gains) losses reclassified from OCI	2014	2013
		2013
Net periodic benefit cost ⁽¹⁾	5	6
Net periodic benefit cost ⁽¹⁾	26	34
	31	40
Provision for taxes	(8)	(11)
	23	29
\	let periodic benefit cost ⁽¹⁾	let periodic benefit cost ⁽¹⁾ 26 31 2rovision for taxes (8)

⁽¹⁾ These components are included in the computation of net periodic benefit cost (see Note 8).

The amounts in respect of unrealized gains (losses) on available-for-sale securities and unrealized gains (losses) of cash flow hedge derivatives were not significant for the three months ended March 31, 2014 and 2013.

Note 11. Operating segment data

The Chief Operating Decision Maker (CODM) is the Company's Executive Committee. The CODM allocates resources to and assesses the performance of each operating segment using the information outlined below. The Company's operating segments consist of Discrete Automation and Motion, Low Voltage Products, Process Automation, Power Products and Power Systems. The remaining operations of the Company are included in Corporate and Other.

A description of the types of products and services provided by each reportable segment is as follows:

- Discrete Automation and Motion: manufactures and sells motors, generators, variable speed
 drives, programmable logic controllers, robots and robotics, solar inverters, wind converters,
 rectifiers, excitation systems, power quality and protection solutions, electric vehicle fast charging
 infrastructure, components and subsystems for railways, and related services for a wide range of
 applications in discrete automation, process industries, transportation and utilities.
- Low Voltage Products: manufactures products and systems that provide protection, control and
 measurement for electrical installations, as well as enclosures, switchboards, electronics and
 electromechanical devices for industrial machines, plants and related service. In addition, the
 segment manufactures products for wiring and cable management, cable protection systems,
 power connection and safety. The segment also makes intelligent building control systems for
 home and building automation.
- **Process Automation:** develops and sells control and plant optimization systems, automation products and solutions, including instrumentation, as well as industry-specific application knowledge and services for the oil, gas and petrochemicals, metals and minerals, marine and turbocharging, pulp and paper, chemical and pharmaceuticals, and power industries.
- Power Products: manufactures and sells high- and medium-voltage switchgear and apparatus, circuit breakers for all current and voltage levels, power and distribution transformers and sensors for electric, gas and water utilities and for industrial and commercial customers.
- Power Systems: designs, installs and upgrades high-efficiency transmission and distribution systems and power plant automation and electrification solutions, including monitoring and control products, software and services and incorporating components manufactured by both the Company and by third parties.
- **Corporate and Other:** includes headquarters, central research and development, the Company's real estate activities, Group treasury operations and other minor business activities.

The Company evaluates the profitability of its segments based on Operational EBITDA, which represents income from operations excluding depreciation and amortization, restructuring and restructuring-related expenses, and acquisition-related expenses and certain non-operational items, as well as foreign exchange/commodity timing differences in income from operations consisting of: (i) unrealized gains and losses on derivatives (foreign exchange, commodities, embedded derivatives), (ii) realized gains and losses on derivatives where the underlying hedged transaction has not yet been realized, and (iii) unrealized foreign exchange movements on receivables/payables (and related assets/liabilities).

The CODM primarily reviews the results of each segment on a basis that is before the elimination of profits made on inventory sales between segments. Segment results below are presented before these eliminations, with a total deduction for intersegment profits to arrive at the Company's consolidated Operational EBITDA. Intersegment sales and transfers are accounted for as if the sales and transfers were to third parties, at current market prices.

The following tables present segment revenues, Operational EBITDA, and the reconciliations of consolidated Operational EBITDA to income from continuing operations before taxes for the three months ended March 31, 2014 and 2013, as well as total assets at March 31, 2014, and December 31, 2013.
